| Immunogen                | Full length CD63 of human origin                                                                                                                                                                                                                              |
| Produktbeschreibung      | This MAb recognizes protein of 26kDa-60kDa, which is identified as CD63. Its epitope is different from that of MAb LAMP3/529. The tetraspanins are integral membrane proteins expressed on cell surface and granular membranes of hematopoietic cells and ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [MX-49.129.5]                                                                                                                                                                                                                                                 |
| Molekulargewicht         | 26kDa (core protein), 30-60kDa (glycosylated)                                                                                                                                                                                                                 |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |

|                        |                                                                                                                                                                                                                                                                |
