Recombinant Human Retinol Binding Protein 4 (RBP4), Transfected HEK293 Cell Culture Supernatant RAY-230-20294-200

Artikelname	Recombinant Human Retinol Binding Protein 4 (RBP4), Transfected HEK293 Cell Culture Supernatant
Artikelnummer	RAY-230-20294-200
Hersteller Artikelnummer	230-20294-200
Alternativnummer	RAY-230-20294-200
Hersteller	RayBiotech
Kategorie	Proteine/Peptide
Spezies Reaktivität	Human
Produktbeschreibung	Recombinant human retinol binding protein 4 (RBP 4) overexpression cell culture supernatant, secreted from the serum-free medium of transfected HEK293 cells. Purchase will also include one vial of normal control (Catalog . 230-20001), the culture sup...
Molekulargewicht	Recombinant protein product has a calculated molecular mass of 20 kDa. Due to the potential post-translational modifications, it migrates as approximately 25 kDa protein bands in SDS-PAGE under DTT, beta-mercaptoethanol reducing conditions.
Tag	His
Expression System	HEK293 cells

Reinheit	Unpurified cell culture supernatant. HEK293 cells grown in serum-free medium were transfected with expression vector harboring target gene. The cell culture was harvested with centrifugation to remove cells. The cell culture supernatant containing mammalian cell protease inhibitor cocktail was aliquoted and stored at -80C immediately. The gene overexpression in culture supernatant was confirmed by Western blotting using anti-His tag antibody and/or target-specific antibodies and the culture supernatant derived from HEK293 cells transfected with the empty expression vector was used as a negative control.
Formulierung	Pink liquid
Sequenz	Glu19-Leu201
Formel	Cell culture supernatant of transfected HEK293 cells, serum-free.
