Produktbeschreibung	Recombinant human NAD(P)HX epimerase overexpression cell culture supernatant, secreted from the serum-free medium of transfected HEK293 cells. Purchase will also include one vial of normal control (Catalog . 230-20001), the culture supernatant of HEK...
Molekulargewicht	Recombinant protein product has a calculated molecular mass of 30 kDa
Tag	His
Expression System	HEK293 cells

Reinheit	Unpurified cell culture supernatant. HEK293 cells grown in serum-free medium were transfected with expression vector harboring target gene. The cell culture was harvested with centrifugation to remove cells. The cell culture supernatant containing mammalian cell protease inhibitor cocktail was aliquoted and stored at -80C immediately. The gene overexpression in culture supernatant was confirmed by Western blotting using anti-His tag antibody and/or target-specific antibodies and the culture supernatant derived from HEK293 cells transfected with the empty expression vector was used as a negative control.
Formulierung	Pink liquid
Sequenz	Gln25-Gln288
Formel	Cell culture supernatant of transfected HEK293 cells, serum-free.
