| Immunogen                | Immunogen was synthetic peptide derived from human Tau. This antibody was obtained from a mice immunized with the immunogen, then fusion, selection and identification. The identified clone was called as 17D3.G7. This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells derived from the immunized mouse. The IgG fraction of cell culture supernatant was purified by Protein G affinity chromatography. |
| Produktbeschreibung      | Mouse anti-Hyper-phosphorylated-Tau (pSer199) Biotinylated Antibody, 50 ug...                                                                                                                                                                                                                                                                                                                                                                               |
