| Produktbeschreibung      | The protein encoded by this gene is a G proteincoupled receptor with seven transmembrane domains that belongs to the beta chemokine receptor family. Chemokines and their receptors are key regulators of thymocyte migration and maturation in normal and... |
| Molekulargewicht         | 47.7 kDa                                                                                                                                                                                                                                                      |
| Tag                      | N-Flag & C-10*His & C-Avi                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">51686</a>                                                                                                                                                                                                                                         |
| Puffer                   | 50 mM HEPES, 150 mM NaCl, DDM, CHS, pH7.5                                                                                                                                                                                                                     |
| Formulierung             | Liquid                                                                                                                                                                                                                                                        |
