| Produktbeschreibung      | This gene encodes cytosolic alanine aminotransaminase 1 (ALT1), also known as glutamatepyruvate transaminase 1. This enzyme catalyzes the reversible transamination between alanine and 2oxoglutarate to generate pyruvate and glutamate and, therefore, p... |
| Molekulargewicht         | 56.5 kDa                                                                                                                                                                                                                                                      |
| Tag                      | C-10*His                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">24298</a>                                                                                                                                                                                                                                         |
| Puffer                   | 20 mM Tris, 0.5 M Arginine, 0.5 M NaCl, pH8.0                                                                                                                                                                                                                 |
| Reinheit                 | 85%                                                                                                                                                                                                                                                           |
