| Hersteller               | AcroBiosystems                                                                                                                                                                                                                                                |
| Wirt                     | Human                                                                                                                                                                                                                                                         |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Konjugation              | PE                                                                                                                                                                                                                                                            |
| Produktbeschreibung      | Alphafetoprotein is found in monomeric as well as dimeric and trimeric forms and binds copper, nickel, fatty acids, and bilirubin. The level of alphafetoprotein in amniotic fluid is used to measure renal loss of protein to screen for spina bifida and... |
| Molekulargewicht         | 36.3 kDa and 11.7 kDa                                                                                                                                                                                                                                         |
| Tag                      | C-10*His                                                                                                                                                                                                                                                      |
| NCBI                     | <a href="#">59606</a>                                                                                                                                                                                                                                         |
| Puffer                   | PBS, 1% BSA, pH7.4                                                                                                                                                                                                                                            |
| Formulierung             | Liquid                                                                                                                                                                                                                                                        |
