| Produktbeschreibung      | B71 and B72, together with their receptors CD28 and CTLA4, constitute one of the dominant costimulatory pathways that regulate T and Bcell responses. Although both CTLA4 and CD28 can bind to the same ligands, CTLA4 binds to B71 and B72 with a 20 100... |
| Molekulargewicht         | 50.9 kDa                                                                                                                                                                                                                                                     |
| Tag                      | C-mFc(mIgG2a)                                                                                                                                                                                                                                                |
| NCBI                     | <a href="#">33681</a>                                                                                                                                                                                                                                        |
| Puffer                   | Tris with Glycine, Arginine and NaCl, pH7.5                                                                                                                                                                                                                  |
| Reinheit                 | 95%                                                                                                                                                                                                                                                          |
