| Produktbeschreibung      | Integrin alpha V beta 1 (alphaVbeta1) is a widely expressed adhesion receptor formed by the noncovalent association of the alphaV and beta1 (CD29) subunits. Its activity is regulated by a conformational shift from a folded, lowaffinity state to an ex... |
| Molekulargewicht         | 112.3 kDa (ITGAV) & 83.5 kDa (ITGB1)                                                                                                                                                                                                                          |
| Tag                      | C-Flag   Native                                                                                                                                                                                                                                               |
| NCBI                     | <a href="#">032428</a>                                                                                                                                                                                                                                        |
| Puffer                   | 50 mM Tris, 150 mM NaCl, pH8.0                                                                                                                                                                                                                                |
| Reinheit                 | 90%                                                                                                                                                                                                                                                           |
| Formulierung             | Powder                                                                                                                                                                                                                                                        |
