| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | PI(5)P PIP Beads <sup>TM</sup> are composed of agarose beads with 10 nanomoles of bound PI(5)P per mL of beads, enough for several protein binding experiments. Each 1 mL order of PIP Beads includes a small amount of control beads. Larger quantities of <a href="#">Control Be...</a> |
| Anwendungsbeschreibung   | Categories: Biochemical Reagents. Related: Beads, Phosphoinositides, PI(5)P. Ship 1 : Shipping Temp. Ship 2: Gel Ice                                                                                                                                                                      |
