| Applikation              | FC                                                                                                                                                                                                |
| Konjugation              | PerCP                                                                                                                                                                                             |
| Produktbeschreibung      | The MOPC-21 immunoglobulin is useful as an isotype-matched control. The MOPC-21 immunoglobulin has an unknown binding specificity and is used as an isotype control for mouse IgG1 antibodies.... |
| Klonalität               | Monoclonal                                                                                                                                                                                        |
| Konzentration            | 0.2 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                        |
| Klon-Bezeichnung         | [MOPC-21]                                                                                                                                                                                         |
| Isotyp                   | IgG1                                                                                                                                                                                              |

|               |                                                                                                                                                                                                                                                                 |
|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sensitivitaet | This mouse IgG1 kappa monoclonal antibody (clone MOPC-21) with unknown specificity has been confirmed as a good negative control with human and rat species, based on multiple testing on rat and human tissues.,We do not recommend use of this product for Hu |
| Puffer        | 10mM NaH <sub>2</sub> PO <sub>4</sub> , 150mM NaCl, 0.1% Gelatin, 0.09% Sodium azide.                                                                                                                                                                           |
| Formulierung  | Liquid                                                                                                                                                                                                                                                          |
