| Artikelname              | Streptavidin antibody [S8C12], IgG1, Unconjugated, Mouse, Monoclonal             |
| Artikelnummer            | GTX10022                                                                         |
| Hersteller Artikelnummer | GTX10022                                                                         |
| Alternativnummer         | GTX10022-500                                                                     |
| Hersteller               | GeneTex                                                                          |
| Wirt                     | Mouse                                                                            |
| Kategorie                | Antikörper                                                                       |
| Applikation              | ELISA, FC, IHC, WB                                                               |
| Spezies Reaktivität      | Bacteria                                                                         |
| Immunogen                | Streptavidin                                                                     |
| Konjugation              | Unconjugated                                                                     |
| Klonalität               | Monoclonal                                                                       |
| Konzentration            | Batch dependent (Please refer to the vial label for the specific concentration.) |
| Klon-Bezeichnung         | [S8C12]                                                                          |
| Isotyp                   | IgG1                                                                             |

|               |                                                                                                                                                                                                                                                                  |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sensitivitaet | No cross-reactivity with egg white avidin. Affinity (Kd) $> 1 \times 10^{-8}$ M. Clone S8C12 reacts with the determinant nonoverlapping with clone S8E4, S10D4 and S3E11 epitopes. This antibody can bind to the streptavidin without interfering with the bioti |
| Puffer        | PBS, 0.09% Sodium azide.                                                                                                                                                                                                                                         |
| Formulierung  | Liquid                                                                                                                                                                                                                                                           |
