| Kategorie                | Antikörper                                                                                                                                                                                                                                                             |
| Applikation              | ELISA, IHC-P                                                                                                                                                                                                                                                           |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                  |
| Immunogen                | A portion of amino acids 416-433 from the human protein was used<br>as the immunogen for the NSE antibody.                                                                                                                                                             |
| Produktbeschreibung      | This monoclonal antibody recognizes a protein of about 50kDa,<br>which is identified as gamma-enolase. Three isoenzymes of enolases<br>are identified, alpha, beta and gamma. Alpha-isoform is expressed in<br>most tissues, whereas beta-form is expressed predomi... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                             |
| Klon-Bezeichnung         | [ENO2/2706]                                                                                                                                                                                                                                                            |
| UniProt                  | <a href="#">P09104</a>                                                                                                                                                                                                                                                 |

|                        |                                                                                                                        |
|------------------------|------------------------------------------------------------------------------------------------------------------------|
| Reinheit               | Protein G affinity chromatography                                                                                      |
| Formulierung           | 1 mg/ml in 1X PBS, BSA free, sodium azide free                                                                         |
| Antibody Type          | Primary Antibody                                                                                                       |
| Application Verdünnung | ELISA: Use Ab at 2-4ug/ml for coating, order Ab without BSA,Immunohistochemistry (FFPE): 1-2ug/ml for 30 minutes at RT |
| Anwendungsbeschreibung | Optimal dilution of the NSE antibody should be determined by the researcher.                                           |
