| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FACS, IHC-P                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Priess human B cell line was used as the immunogen for the Pan-HLA antibody.                                                                                                                                                                                  |
| Produktbeschreibung      | Reacts with a common epitope of human major histocompatibility (MHC) class II antigens, HLA-DP, -DQ and -DR. Human MHC class II antigens are transmembrane glycoproteins composed of an alpha chain (36kDa) and a beta chain (27kDa). They are expressed p... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [HLA-Pan/6663]                                                                                                                                                                                                                                                |
| UniProt                  | <a href="#">P04440</a>                                                                                                                                                                                                                                        |

|                        |                                                                                  |
|------------------------|----------------------------------------------------------------------------------|
| Reinheit               | Protein A/G affinity                                                             |
| Formulierung           | 0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced), 0.05% sodium azide          |
| Antibody Type          | Primary Antibody                                                                 |
| Application Verdünnung | Flow cytometry: 1-2ug/million cells,Immunohistochemistry (FFPE): 1-2ug/ml        |
| Anwendungsbeschreibung | Optimal dilution of the Pan-HLA antibody should be determined by the researcher. |
