| Kategorie                | Antikörper                                                                                                                                                                                                                                                             |
| Applikation              | IHC-P                                                                                                                                                                                                                                                                  |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                  |
| Immunogen                | A portion of amino acids 1-200 was used as the immunogen for the<br>Fibroblast Activation Protein Alpha antibody.                                                                                                                                                      |
| Produktbeschreibung      | FAP (fibroblast activation protein) is a cell surface glycoprotein and<br>serine protease that is expressed primarily in fetal mesenchymal<br>tissues and epithelial cancer fibroblasts. In cancer, FAP functions to<br>promote cellular proliferation. In embryoni... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                             |
| Klon-Bezeichnung         | [FAP/4851]                                                                                                                                                                                                                                                             |
| UniProt                  | <a href="#">Q12884</a>                                                                                                                                                                                                                                                 |

|                        |                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------|
| Reinheit               | Protein A/G affinity                                                                                         |
| Formulierung           | 1 mg/ml in 1X PBS, BSA free, sodium azide free                                                               |
| Antibody Type          | Primary Antibody                                                                                             |
| Application Verdünnung | Immunohistochemistry (FFPE): 1-2ug/ml                                                                        |
| Anwendungsbeschreibung | Optimal dilution of the Fibroblast Activation Protein Alpha antibody should be determined by the researcher. |
