| Wirt                     | Mouse                                                                                                                                                                                                                                                         |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC-P, WB                                                                                                                                                                                                                                                     |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A portion of amino acids 233-362 was used as the immunogen for the recombinant INHA antibody.                                                                                                                                                                 |
| Produktbeschreibung      | It recognizes a 47kDa protein, which is identified as alpha sub-unit of Inhibin. It is a gonadal protein that preferentially suppresses the secretion of pituitary follicle-stimulating hormone (FSH). Inhibin comprises two subunits, Inhibin A and Inhib... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [rINHA/6919]                                                                                                                                                                                                                                                  |
| UniProt                  | <a href="#">P05111</a>                                                                                                                                                                                                                                        |

|                        |                                                                                           |
|------------------------|-------------------------------------------------------------------------------------------|
| Reinheit               | Protein A/G affinity                                                                      |
| Formulierung           | 1 mg/ml in 1X PBS, BSA free, sodium azide free                                            |
| Antibody Type          | Primary Antibody                                                                          |
| Application Verdünnung | Immunohistochemistry (FFPE): 1-2ug/ml, Western blot: 2-4ug/ml                             |
| Anwendungsbeschreibung | Optimal dilution of the recombinant INHA antibody should be determined by the researcher. |
