| Wirt                     | Mouse                                                                                                                                                                                                                                                                 |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                            |
| Applikation              | ELISA, ICC, IHC, WB                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                                     |
| Immunogen                | Fusion protein amino acids 469-691 (SH3/PDZ domains) of rat<br>Shank1 (accession number Q9WV48) produced recombinantly in E.<br>Coli                                                                                                                                  |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | Our carrier-free Anti-Shank1 mouse monoclonal primary antibody<br>from NeuroMab is produced in-house from hybridoma clone N22/21.<br>It detects human, mouse, and rat Shank1, and is purified by Protein<br>A chromatography. It is great for use in IHC, ICC, WB.... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                            |
| Konzentration            | 1 mg/mL                                                                                                                                                                                                                                                               |

|                        |                                              |
|------------------------|----------------------------------------------|
| Klon-Bezeichnung       | [N22/21]                                     |
| Molekulargewicht       | 190-220 kDa (alternative splice variants)    |
| Isotyp                 | IgG1                                         |
| UniProt                | <a href="#">Q9WV48</a>                       |
| Puffer                 | PBS                                          |
| Target-Kategorie       | Shank1                                       |
| Antibody Type          | Primary Antibody                             |
| Anwendungsbeschreibung | Format: Purified by Protein A chromatography |
