| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | PVALB Human Recombinant fused with a 24 amino acid His tag at N-terminus produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 134 amino acids (1-110 a.a.) and having a molecular mass of 14.6kDa. The PVALB is purified by prop... |
| NCBI                     | <a href="#">5816</a>                                                                                                                                                                                                                                          |
| Reinheit                 | Greater than 95.0% as determined by SDS-PAGE.                                                                                                                                                                                                                 |
| Formulierung             | The PVALB solution (1 mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 1mM DTT, 10% glycerol and 50mM NaCl. Physical appearance: Sterile Filtered colorless solution.                                                                                           |
