| Applikation              | ELISA, IF, IHC, WB                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant Human Inactive peptidyl-prolyl cis-trans isomerase FKBP6 protein (101-327AA)                                                                                                                                                                      |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | Co-chaperone required during spermatogenesis to repress transposable elements and prevent their mobilization, which is essential for the germline integrity. Acts via the piRNA metabolic process, which mediates the repression of transposable elements ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| NCBI                     | <a href="#">8468</a>                                                                                                                                                                                                                                          |
