| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human, Rabbit                                                                                                                                                                                                                                                 |
| Immunogen                | The immunogen is a synthetic peptide directed towards the N terminal region of human DGKE                                                                                                                                                                     |
| Produktbeschreibung      | Diacylglycerol kinases are thought to be involved mainly in the regeneration of phosphatidylinositol (PI) from diacylglycerol in the PI-cycle during cell signal transduction. When expressed in mammalian cells, DGK-epsilon shows specificity for arachi... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
| Konzentration            | 0.5 mg/ml                                                                                                                                                                                                                                                     |
| Molekulargewicht         | 64kDa                                                                                                                                                                                                                                                         |
| NCBI                     | <a href="#">8526</a>                                                                                                                                                                                                                                          |

|              |                                                                                                   |
