| Hersteller               | Vector Biolabs                                                                                                                                                                                                                                                |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | Cyclin A-Cdk2 kinase activity is essential for progression of the cell through S phase. Skp1 p19 and Skp2 p45 are elements of the cyclin A-Cdk2 S phase kinase. The binding of p19 to cyclin A-Cdk2 is p45-dependent, and levels of p45 are substantially ... |
| Konzentration            | 1x10 <sup>10</sup> PFU/ml                                                                                                                                                                                                                                     |
| Puffer                   | DMEM, 2% BSA, 2.5% Glycerol                                                                                                                                                                                                                                   |
