Product Datasheet

Recombinant Human ACE-2 (C-6His) EBT-EPT135

Artikelname	Recombinant Human ACE-2 (C-6His)
Artikelnummer	EBT-EPT135
Hersteller Artikelnummer	EPT135
Alternativnummer	EBT-EPT135-50
Hersteller	ELK Biotechnology
Kategorie	Proteine/Peptide
Produktbeschreibung	Recombinant Human Angiotensin-Converting Enzyme 2 is produced by our Mammalian expression system and the target gene encoding Gln18-Ser740 is expressed with a 6His tag at the C-terminus....
Molekulargewicht	Molecular weight: 84.63 KDa. Apparent molecular weight: 103 KDa, reducing conditions
UniProt	Q9BYF1
Reinheit	Greater than 95% as determined by reducing SDS-PAGE.

Anwendungsbeschreibung	Endotoxin: Less than 0.1 ng/μg (1 EU/μg) as determined by LAL test. Biological activity: Immobilized Human ACE-2-His(CatC419) at 2μg/ml (100 μl/well) can bind 2019-nCoV S Protein RBD-Fc(CatDRA121). The ED50 of 2019-nCoV S Protein RBD (N501Y, C-Fc)(CatDRA121) is 3.57 ng/ml. Background: Angiotensin-Converting Enzyme 2 (ACE-2) is an integral membrane protein and a zinc metalloprotease of the ACE family, the ACE family includes somatic and germinal ACE. ACE-2 cleaves angiotensins I and II as a carboxypeptidase, ACE-2 converts angiotensin I to angiotensin 1-9, and angiotensin II to angiotensin 1-7. ACE-2 is also able to hydrolyze apelin-13 and dynorphin-13 with high efficiency. ACE-2 can be high expressed in testis, kidney and heart, in colon, small intestine and ovary at moderate levels. Captopril and lisinopril as the classical ACE inhibitor don't inhibit ACE-2 activity. ACE-2 may play an important role in regulating the heart function
