CheKine(TM) Micro alpha-glucosidase(alpha-GC) Activity Assay Kit ASC-KTB1015

Artikelname	CheKine(TM) Micro alpha-glucosidase(alpha-GC) Activity Assay Kit
Artikelnummer	ASC-KTB1015
Hersteller Artikelnummer	KTB1015
Alternativnummer	ASC-KTB1015-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Produktbeschreibung	CheKine(TM) Micro alpha-glucosidase(alpha-GC) Activity Assay Kit is designed to detect the alpha-GC in the sample....
Tag	alpha-GC
Anwendungsbeschreibung	The CheKine(TM) alpha-Glucosidase Activity Assay Kit (micro assay) provides a simple method for the detection of glycogen synthase activity in biological samples such as plant and animal tissues, cells and serum (plasma). In the assay, p-nitrophenol, which is present in the sample, has a maximum absorption peak at 400 nm, and alpha-GC activity is calculated by determining the rate of increase in absorbance value.
