Human Smoothened homolog (SMO) ELISA Kit ASC-KTE60569

Artikelname	Human Smoothened homolog (SMO) ELISA Kit
Artikelnummer	ASC-KTE60569
Hersteller Artikelnummer	KTE60569
Alternativnummer	ASC-KTE60569-48, ASC-KTE60569-96
Hersteller	Abbkine Scientific
Kategorie	Kits/Assays
Applikation	ELISA
Spezies Reaktivität	Human
Produktbeschreibung	This Human Smoothened homolog (SMO) ELISA Kit employs a two-site sandwich ELISA to quantitate SMO....
Detektionsbereich	Please inquire
Sensitivitaet	Please inquire
Tag	SMO
NCBI	6608
UniProt	Q99835
Proben	Cell culture supernatantsSerumPlasmaOther biological fluids

Anwendungsbeschreibung	This Human Smoothed homolog (SMO) ELISA Kit employs a two-site sandwich ELISA to quantitate SMO in samples. An antibody specific for SMO has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any SMO present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for SMO is added to the wells. After washing, Streptavidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of SMO bound in the initial step. The color development is stopped and the intensity of the color is measured.
