Product Datasheet

Rocaglamide, CAS [[84573-16-0]] FBM-10-2484

Artikelname	Rocaglamide, CAS [[84573-16-0]]
Artikelnummer	FBM-10-2484
Hersteller Artikelnummer	10-2484
Alternativnummer	FBM-10-2484-500UG,FBM-10-2484-2MG
Hersteller	Focus Biomolecules
Kategorie	Biochemikalien
Produktbeschreibung	TNF-alpha inhibitor...
Molekulargewicht	505.57
Reinheit	97% by HPLC
Formulierung	White solid - presented as thin film on glass vial
CAS Nummer	[84573-16-0]
Formel	C29H31NO7

Anwendungsbeschreibung	Rocaglamide is a potent inhibitor of NFkB in T-lymphocytes with almost complete inhibition at 200nM.¹ It was able to completely inhibit IL-4 and IFN-gamma production and suppress 60-85% of IL-2 and TNF-alpha production at 50nM in T-cells without inhibiting AP-1 and NF-kB (conversely, at concentrations <100nM, it was shown to increase NF-kB activity).² Immunosuppression activity was due to inhibition of cytokine gene expression via blocking of NF-AT activity and is a different mechanism than suppression via Cyclosporine a and FK-506. Rocaglamide has anti-cancer properties via various pathways including ERK inhibition³, ATM/ATR-Chk1/Chk2 activation⁴, and p38 and JNK activation⁵.
