| Hersteller               | Krishgen Biosystems                                                                                                                                                                                                                                            |
| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                    |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                          |
| Produktbeschreibung      | The GENLISA Human Nucleobindin 2 (NUCB-2 / NUCB2) ELISA includes features like: - Ready to use protocol with break-apart wells for ease of use - Standardisation and High Reproducibility - Lot to Lot Consistency - Accuracy and Precision Validated again... |
| Detektionsbereich        | 0 - 1000 ng/ml* (May vary. Please confirm)                                                                                                                                                                                                                     |
| Sensitivitaet            | 30 ng/ml* (May vary. Please confirm)                                                                                                                                                                                                                           |
| Proben                   | Serum, Plasma, Cell Culture Supernatant and other biological samples. Validated for citrated/EDTA Plasma only.                                                                                                                                                 |
