| Produktbeschreibung      | Regulatory light chain of myosin. Does not bind calcium. Source: Recombinant protein corresponding to aa3-151 from human MYL6, fused to GST-Tag at N-terminal, expressed in E. coli. Molecular Weight: ~43.7kD Amino Acid Sequence: DFTEDQTAEFKEAFQLFDRTGD... |
| Molekulargewicht         | 43.7                                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">P60660</a>                                                                                                                                                                                                                                        |
| Reinheit                 | 90% (SDS-PAGE)                                                                                                                                                                                                                                                |
| Formulierung             | Supplied as a lyophilized powder from 20mM Tris-HCl, 0.5M sodium chloride, pH 8.0, 6% trehalose. Reconstitute with sterile ddH2O to a concentration of 0.1-1mg/ml.                                                                                            |
