| Produktbeschreibung      | Kremen (Kringle-containing protein marking the eye and the nose) proteins are type I transmembrane proteins that contain extracellular kringle, WSC and CUB domains, and an intracellular region with no conserved motifs (1). Two related molecules, Krem... |
| NCBI                     | <a href="#">220206</a>                                                                                                                                                                                                                                        |
| Reinheit                 | 85%, as determined by SDS-PAGE under reducing conditions and visualized by silver stain. Endotoxin: 0.01EU/1ug.                                                                                                                                               |
| Formulierung             | Supplied as a lyophilized powder in PBS. Reconstitute with 250ul sterile PBS.                                                                                                                                                                                 |
