| Kategorie                | Molekularbiologie                                                                                                                                                                                                                                             |
| Produktbeschreibung      | STAT1, also known as STAT91, is a member of the STAT protein family. In response to cytokines and growth factors, STAT family members are phosphorylated by the receptor associated kinases, and then form homo- or heterodimers that translocate to the c... |
| Molekulargewicht         | 85.2                                                                                                                                                                                                                                                          |
| NCBI                     | <a href="#">009330</a>                                                                                                                                                                                                                                        |
| Reinheit                 | ~90% (SDS-PAGE)                                                                                                                                                                                                                                               |
| Formulierung             | Supplied as a liquid in 20mM Tris-HCl, pH 8.0, 0.1M sodium chloride, 1mM DTT, 10% glycerol.                                                                                                                                                                   |
