| Hersteller Artikelnummer | U1622-17                                                                                                                                                                                                                                                      |
| Alternativnummer         | USB-U1622-17-100                                                                                                                                                                                                                                              |
| Hersteller               | US Biological                                                                                                                                                                                                                                                 |
| Wirt                     | Rabbit                                                                                                                                                                                                                                                        |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | ELISA, WB                                                                                                                                                                                                                                                     |
| Immunogen                | An 18 amino acid peptide sequence between the 3rd and 4th transmembrane domain of rat UCP3 (1) was used to generate anti-UCP3                                                                                                                                 |
| Produktbeschreibung      | The regulation of body weight depends upon the calorie intake and expenditure. It is a very complex and highly regulated process. It involves multiples neural circuits with specific neuropeptides, neurotransmitter transporters and receptors and influ... |
| Reinheit                 | Affinity purified over the control-peptide Sepharose                                                                                                                                                                                                          |
| Formulierung             | Supplied as a lyophilized powder from PBS, 0.05% sodium azide.                                                                                                                                                                                                |
