| Hersteller               | Boster Bio                                                                                                                                                                                                                                                    |
| Kategorie                | Zellen/Zellkultur                                                                                                                                                                                                                                             |
| Applikation              | FA                                                                                                                                                                                                                                                            |
| Produktbeschreibung      | The CRE Luciferase Reporter cell line is a stably transfected HEK 293 cell line which expresses Renilla luciferase reporter gene under the transcriptional control of the cAMP response element (CRE). The CRE cell line is designed to monitor the cAMP/P... |
| Puffer                   | Each vial contains $2 \sim 3 \times 10^6$ cells in 1 ml of 90% FBS + 10% DMSO.                                                                                                                                                                                |
| Application Verdünnung   | <h2>Application:</h2>Monitor the GPCR-linked cAMP/PKA signaling pathway.Screen for activators or inhibitors of the GPCR-linked cAMP/PKA signaling pathway. <h2>Culture conditions:</h2>Cells should be grown at 37C with 5% CO2 using D                       |
