| Kategorie                | Antikörper                                                                                                                                                                 |
| Applikation              | ELISA, IF, IHC, WB                                                                                                                                                         |
| Spezies Reaktivität      | Human                                                                                                                                                                      |
| Immunogen                | Glucagon antibody was prepared from whole rabbit serum produced by repeated immunizations with a synthetic peptide corresponding to an internal portion of human Glucagon. |
| Konjugation              | Unconjugated                                                                                                                                                               |
| Produktbeschreibung      | Glucagon Antibody...                                                                                                                                                       |
| Klonalität               | Polyclonal                                                                                                                                                                 |
| Konzentration            | 1.18 mg/mL                                                                                                                                                                 |
| NCBI                     | <a href="#">002045</a>                                                                                                                                                     |

|                        |                                                                                                                                                                                                                                                                                                                                 |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Puffer                 | Preservative: 0.01% (w/v) Sodium Azide. Stabilizer: None, Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2                                                                                                                                                                                                    |
| Reinheit               | This affinity purified antibody is directed against human Glucagon. This product was affinity purified from monospecific antiserum by immunoaffinity purification. A BLAST analysis was used to suggest cross-reactivity with the antigen based on 100% homology with the immunizing sequence to human, chimpanzee, and bonobo. |
| Formulierung           | Liquid (sterile filtered)                                                                                                                                                                                                                                                                                                       |
| Application Verdünnung | ELISA: 1:24,800-1:44,800, IHC: 1:100, IF: 5-15µg/mL                                                                                                                                                                                                                                                                             |
| Anwendungsbeschreibung | Application Notes: Anti-Glucagon is tested in ELISA, IF, IHC-P, and Western Blot. Expect a band approximately ~20.9 kDa corresponding to the appropriate cell lysate or extract. Specific conditions for reactivity should be optimized by the end user                                                                         |
