Rat Immunoglobulin M (IgM) ELISA Kit BYT-ORB1806983

| | |
|--------------------------|---|
| Artikelname | Rat Immunoglobulin M (IgM) ELISA Kit |
| Artikelnummer | BYT-ORB1806983 |
| Hersteller Artikelnummer | orb1806983 |
| Alternativnummer | BYT-ORB1806983-48,BYT-ORB1806983-96 |
| Hersteller | Biorbyt |
| Kategorie | Kits/Assays |
| Spezies Reaktivität | Rat |
| Produktbeschreibung | Rat Immunoglobulin M (IgM) ELISA Kit... |
| Detektionsbereich | 7.81-500ng/mL |
| Sensitivitaet | 4.69 ng/mL |
| Proben | serum, plasma, Tissue homogenate and Other biological samples |
| Target-Kategorie | IgM |

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat IgM. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat IgM and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat IgM, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Rat IgM. You can calculate the concentration of Rat IgM in the samples by comparing the OD of the samples to the standard curve
