Rat Interferon Gamma (IFN-gamma) ELISA Kit BYT-ORB1806989

Artikelname	Rat Interferon Gamma (IFN-gamma) ELISA Kit
Artikelnummer	BYT-ORB1806989
Hersteller Artikelnummer	orb1806989
Alternativnummer	BYT-ORB1806989-48,BYT-ORB1806989-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Produktbeschreibung	Rat Interferon Gamma (IFN-gamma) ELISA Kit...
Detektionsbereich	31.25-2000pg/mL
Sensitivitaet	18.75 pg/mL
UniProt	P01581
Proben	serum, plasma, Tissue homogenate and Other biological samples
Target-Kategorie	IFN-gamma

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat IFN-gamma. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat IFN-gamma and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat IFN-gamma, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Rat IFN-gamma. You can calculate the concentration of Rat IFN-gamma in the samples by comparing the OD of the samples to the standard curve
