Human Adrenocorticotrophic Hormone (ACTH) ELISA Kit BYT-ORB1807127

Artikelname	Human Adrenocorticotrophic Hormone (ACTH) ELISA Kit
Artikelnummer	BYT-ORB1807127
Hersteller Artikelnummer	orb1807127
Alternativnummer	BYT-ORB1807127-48,BYT-ORB1807127-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Human
Produktbeschreibung	Human Adrenocorticotrophic Hormone (ACTH) ELISA Kit...
Detektionsbereich	15.63-1000pg/mL
Sensitivitaet	5.47 pg/mL
UniProt	P63267
Proben	serum, plasma, Tissue homogenate and Other biological samples
Target-Kategorie	ACTH

Anwendungsbeschreibung	Application Notes: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Human ACTH. During the reaction, Human ACTH in the sample or standard competes with a fixed amount of Human ACTH on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Human ACTH. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm $\pm$ 2 nm. The concentration of Human ACTH in tested samples can be calculated by comparing the OD of the samples to the standard curve
