## Product Datasheet

### Mouse Alpha-Melanocyte Stimulating Hormone (alphaMSH) ELISA Kit BYT-ORB1946764

Artikelname	Mouse Alpha-Melanocyte Stimulating Hormone (alphaMSH) ELISA Kit
Artikelnummer	BYT-ORB1946764
Hersteller Artikelnummer	orb1946764
Alternativnummer	BYT-ORB1946764-48,BYT-ORB1946764-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Mouse
Produktbeschreibung	Mouse Alpha-Melanocyte Stimulating Hormone (alphaMSH) ELISA Kit...
Detektionsbereich	15.63-1000pg/mL
Sensitivitaet	9.38 pg/mL
UniProt	<a href="#">P01193</a>
Proben	serum, plasma, Tissue homogenate and Other biological samples
Target-Kategorie	alphaMSH

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Mouse alphaMSH. During the reaction, Mouse alphaMSH in the sample or standard competes with a fixed amount of Mouse alphaMSH on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Mouse alphaMSH. Excess conjugate and unbound sample or standard are washed away, and Avidin-Horseradish Peroxidase (HRP) conjugate are added to each micro plate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns from blue to yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm  $\pm$  2 nm. The concentration of Mouse alphaMSH in tested samples can be calculated by comparing the OD of the samples to the standard curve
