Product Datasheet

Rat soluble E-selectin (sE-selectin) ELISA Kit BYT-ORB1946904

Artikelname	Rat soluble E-selectin (sE-selectin) ELISA Kit
Artikelnummer	BYT-ORB1946904
Hersteller Artikelnummer	orb1946904
Alternativnummer	BYT-ORB1946904-48,BYT-ORB1946904-96
Hersteller	Biorbyt
Kategorie	Kits/Assays
Spezies Reaktivität	Rat
Produktbeschreibung	Rat soluble E-selectin (sE-selectin) ELISA Kit...
Detektionsbereich	62.5-4000pg/mL
Sensitivitaet	37.5 pg/mL
Proben	serum, plasma, Tissue homogenate and Other biological samples
Target-Kategorie	sE-selectin

Anwendungsbeschreibung

Application Notes: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Rat sE-selectin. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Rat sE-selectin and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Rat sE-selectin, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm. The OD value is proportional to the concentration of Rat sE-selectin. You can calculate the concentration of Rat sE-selectin in the samples by comparing the OD of the samples to the standard curve
