Anwendungsbeschreibung

Solubility: It is recommended to reconstitute the lyophilized Vascular Endothelial Growth Factor in sterile 18MO-cm H<sub>2</sub>O not less than 100µg/ml, which can then be further diluted to other aqueous solutions. Biological Activity: The biological activity is determined by the dose-dependent stimulation of the proliferation of human umbilical vein endothelial cells (HUVEC) using a concentration range of 5.0 ng/ml corresponding to a specific activity of 200,000IU/mg. Application Notes: Cytokines And Growth Factors
