### **TIM-3 / HAVCR2 Recombinant Protein BYT-ORB1231204**

|                          |                                              |
|--------------------------|----------------------------------------------|
| Artikelname              | TIM-3 / HAVCR2 Recombinant Protein           |
| Artikelnummer            | BYT-ORB1231204                               |
| Hersteller Artikelnummer | orb1231204                                   |
| Alternativnummer         | BYT-ORB1231204-0.1                           |
| Hersteller               | Biorbyt                                      |
| Kategorie                | Proteine/Peptide                             |
| Applikation              | ELISA, WB                                    |
| Produktbeschreibung      | TIM-3 / HAVCR2 Recombinant Protein...        |
| Molekulargewicht         | 46.8 kDa                                     |
| NCBI                     | <a href="#">116171</a>                       |
| UniProt                  | <a href="#">Q8TDQ0</a>                       |
| Puffer                   | Tris with Glycine, Arginine and NaCl, pH 7.5 |
| Reinheit                 | >95% as determined by SDS-PAGE.              |
| Formulierung             | Lyophilized                                  |
| Sequenz                  | Ser 22 - Arg 200                             |
| Target-Kategorie         | HAVCR2                                       |

|                        |                                                                                                                                                                                                                             |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Anwendungsbeschreibung | Application Notes: This protein carries a mouse IgG2a Fc tag at the C-terminus. The protein has a calculated MW of 46.8 kDa. The protein migrates as 50-66 kDa under reducing (R) condition (SDS-PAGE) due to glycosylation |
