| Immunogen                | Full length recombinant Cytochrome C protein was used as the immunogen for this antibody.                                                                                                                                                                     |
| Produktbeschreibung      | Cytochrome C is an inner mitochondrial membrane hemeprotein encoded by CYCS gene. Cytochrome C has two major roles within the cell, firstly, it acts as an electron carrier between Complex III (Cytochrome bc1 complex) and Complex IV (Cytochrome C oxid... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [ABM30D4]                                                                                                                                                                                                                                                     |
