| Immunogen                | A partial length recombinant mTLR9 protein (amino acids 602-860) was used as the immunogen for this antibody.                                                                                                                                                 |
| Produktbeschreibung      | Mouse Toll-like receptor 9 (mTLR9) is an innate immune sensor for microbial DNA that erroneously responds to self DNA in autoimmune disease. TLR9 is normally expressed in endosomes/lysosomes where it is activated by pathogen-derived DNA. It has modul... |
