| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant DLL4 protein (amino acids 423-650) was used as the immunogen for this antibody.                                                                                                                                                  |
| Produktbeschreibung      | DLL4 (Delta-like 4), a membrane-bound Notch ligand, plays a fundamental role in vascular development and angiogenesis. It is highly expressed in capillary endothelial tip cells and is involved in suppressing neighboring stalk cells to become tip cell... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
