| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | WB                                                                                                                                                                                                                                                            |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | A partial length recombinant Endoglin protein (amino acids 43-287) was used as the immunogen for this antibody.                                                                                                                                               |
| Produktbeschreibung      | ENG (Endoglin) is an integral membrane glycoprotein that serves as a co receptor for members of the transforming growth factor-beta superfamily of proteins. It is a type I membrane glycoprotein expressed as a disulfide-linked homodimer on human vascu... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
