| Immunogen                | Human Burkitts lymphoma cells                                                                                                                                                                                                                                 |
| Produktbeschreibung      | Recognizes a protein of 130-140kDa, identified as CD22 (also known as BL-CAM). CD22 expression is restricted to normal and neoplastic B cells and is absent from other haemopoietic cell types. In B-cell ontogeny, CD22 is first expressed in the cytopla... |
