| Immunogen                | Human K562 tumor cells                                                                                                                                                                                                                                        |
| Produktbeschreibung      | Reacts with human CD59, a 20kDa glycosyl phosphatidyl-inositol (GPI)-anchored cell surface protein. CD59 regulates complement-mediated cell lysis, and it is involved in lymphocyte signal transduction. This protein is a potent inhibitor of the complem... |
