| Immunogen                | Recombinant chicken i-catenin                                                                                                                                                                                                                                 |
| Produktbeschreibung      | This MAb recognizes a protein of 92kDa, which is identified as beta-catenin. It shows no cross-reaction with gamma-catenin (also known as plakoglobin). The catenins, alpha, beta and gamma bind to the highly conserved, intracellular cytoplasmic tail o... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
