| Immunogen                | Recombinant fragment (around aa 28-162) of human EPO protein (exact sequence is proprietary)                                                                                                                                                                  |
| Produktbeschreibung      | Recognizes a protein of about 37kDa, which is identified as Erythropoietin (EPO). Erythropoietin is a secreted, glycosylated cytokine hormone composed of four alpha helical bundles. It is the primary factor responsible for regulating erythropoiesis d... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [EPO/1367]                                                                                                                                                                                                                                                    |
