| Produktbeschreibung      | Recognizes an integral membrane glycoprotein of 150kDa, identified as CD13 (also known as aminopeptidase-N). The antibody recognizes an extracellular epitope. The CD13 antigen is present on most cells of myeloid origin including granulocytes, monocy... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                   |
