| Immunogen                | Recombinant full-length human KRT13 protein                                                                                                                                                                                                                   |
| Produktbeschreibung      | Cytokeratin 13 (KRT13) is the major acidic keratin, which together with KRT4, its basic partner, is expressed in the suprabasal layers of non-cornified stratified epithelia including tongue mucosa, esophagus, anal canal epithelium, tracheal epitheliu... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [KRT13/2213]                                                                                                                                                                                                                                                  |
| NCBI                     | <a href="#">3860</a>                                                                                                                                                                                                                                          |

|                        |                                                                                                                                                                                                                                                                 |
