| Immunogen                | Recombinant full-length human NRF1 protein                                                                                                                                                                                                                    |
| Produktbeschreibung      | The NF-E2 DNA binding protein is composed of two subunits, p45 and MafK, and it regulates expression of globin genes in developing erythroid cells through interaction with Maf recognition elements (MAREs). A family of NF-E2 related proteins, which ar... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [NRF1/2608]                                                                                                                                                                                                                                                   |
